

Arrival at camp checklist

Entering Park		
		Check in
		Unhook sway bars, if needed
		Dump holding tanks, if needed
		Fill up fresh water tank and pressurize
		Fill BW tank with 5 gallons, add Calgon, if needed
Parking trailer		
		Ensure there are no low hanging trees branches
		Situate trailer as desire, ensure clearance for slideout and beds
		Level the trailer side to side using boards under the trailer wheels (Leave slightly high (1/2-1 pt) on slide side)
		Install Wheel chocks
		Unhitch from vehicle, but stay connected for power to jack & slide
		Note height of tongue for departure ()
		Check front to rear level of trailer—adjust as necessary
		Lower stabilizer jacks (4)
		Install X-chocks
		Final check of outside slide clearance
Set-up		
		Lower bunks
		Extend slide
		Disconnect power from vehicle and pull away
		Connect electric if available. Use surge protector
		Turn on AC or Furnace as needed
		Check refrigerator is on electric or gas as needed
		Turn on water heater
		Extend awning
		Open stove vent
