

1 QUALITY TESTED

Lane Prides Itself on Its High Test Standards:

- Seat foam must meet 28 pound compression testing at 1.8 density
- 275 pound stability test on all frames
- 100,000 double rub tests on leathers - which means approximately 7-10 years
- 12,000 - 15,000 double rub test on fabrics - which means approximately 3-5 years
- 5,000 drop tests on seam fatigue
- Color fastness transfer testing
- 15,000 life cycle test on mechanisms - which means approximately 10+ years
