

For people who don't mess around with cords!

50 Amp RV Power Cord Reel

This low profile cord reel is designed and manufactured for the RV Industry. The design allows for installation in low compartments or frame of 5th wheel. Typically used in 5th wheels and coaches with shorter compartments.

No other cord reel device retrieves more quickly or stores more compactly. Pull the cord and it free-spools off the reel...you only pull off what you need. To retrieve, push the button (motorized) or turn the hand crank (manual).

Optional floor portal and roller kits are recommended for cords exiting through storage compartment floors. If your RV has a twist lock plug in the storage compartment, optional female twist lock connector on the end of the pigtail simplifies installation.

FEATURES

Model CL50D02L-SR

- ▶ High Quality
- ▶ Compact Space Saving Design
- ▶ Motorized or Handcrank
- ▶ Clean, Safe, and Affordable
- ▶ Easily Installs with Common Hand Tools

BENEFITS

- ▶ Reel free spools for cord removal and is powered in by drive motor
- ▶ No remote controls necessary
- ▶ Eliminates tangled and kinked cords
- ▶ Non-stiffening, super flexible power cord
- ▶ Reels are hard wired into the coach
- ▶ Spool sides and core are anodized aluminum
- ▶ Side frames powder coated galvanized steel
- ▶ Reels can be black or white in color
- ▶ Can be hung from ceiling or wall
- ▶ 4 foot pigtail attaches the reel to the transfer switch or junction box

TECHNICAL DATA

- ▶ Cord Capacity: 34 feet of 6/3 8/1 flexible cord
- ▶ Pigtail is separate from cord set and can be up to 25 feet long
- ▶ Certification ETL – File # 3082696
- ▶ Dimensions: 17" W x 10.5" D x 11.5" H
- ▶ Drive System: 12 VDC or 24 VDC chain drive gear motor. No clutches – system always engaged.
- ▶ Amp Draw: 4-6 Amps in normal operation. Up to 12 Amps in locked rotor condition – motor overload trips between 10-12 Amps depending on duration.
- ▶ Weight: 48 lbs (reel with 34 foot cord and 4 foot pigtail)

IT'S JUST A BETTER SYSTEM!
