

Did you know?...

As part of our 2015 model change we have been transitioning to a new dash radio.

Heading out...

Magnadyne M4 & M3 (M3 is the same as M4, but without Navigation. Used on 2250 and 2251 floor plans only)

This multi-function head unit features...

- AM/FM stereo
- DVD player
- Navigation
- 30-pin iPod cable (30-pin) (30-pin does not work for newer Apple devices)
- Bluetooth
- Weather Band
- *Sirius Ready* (No tuner or antenna)

“**Sirius Ready**” is a very confusing statement. This is not a Forest River term, but a Sirius term. The following excerpt is directly from the SiriusXM website.

“What does Sirius-Ready or XM-Ready mean?”

If your A/V receiver or audio system says Sirius-Ready, it simply means that it's capable of giving you a seamless, fully integrated satellite radio experience. Makes sense, right? **You'll likely just have to add a compatible tuner to your A/V receiver or audio system.**

“Ready” doesn’t seem as “ready” as they make it sound does it? Your customer may not know this either. You will need to add a tuner and antenna to get a Radio ID (ESN or SID). The Sirius tuner and antenna kit (SXV200) is available at any electronics store.

Shipping Now...

Jensen VM9726BT (We will use the same radio on ALL models)

What changes?

- **No Weather Band**
- Includes the latest iGO navigation software, with more points of interest and easier use.
- Sirius tuner and antenna come pre-installed, no more confusion
- Multi-Use USB port that will accept Lightning, 30-pin or standard customer provided USB cable.
- Real knob for volume control

“Tell me and I forget, teach me and I may remember, involve me and I learn.”

-Benjamin Franklin-
