

## Fig. 2

| Curbside | Measurement |
| :---: | :---: |
| $\mathrm{Y}-1$ |  |
| $\mathrm{Y}-2$ |  |
| $\mathrm{Y}-3$ |  |

| Roadside | Measurement |
| :---: | :---: |
| Y-1 |  |
| Y-2 |  |
| Y-3 |  |

1. Unit must be pulled into work space straight and evenly.
2. When measuring axle hanger, measure where hanger meets I-beam (Fig. 3 and 4).

NOTE: Be sure to measure as high on the hanger as possible if other components interfere with measurement point on the hanger.
3. On measurements $\mathrm{W}-1$ and $\mathrm{W}-2$, (Fig. 1) be sure to measure top of hanger.
4. When measuring $X-1$ and $X-2$, (Fig. 1) be sure to measure from the top of the hanger on both ends.
5. Measure T-1 and T-2 (Fig. 1) from center of axle hanger to intersection of main rail and front crossmember.
6. On measurements Z-1 and Z-2, (Fig. 1) be sure to measure top of hanger and bottom main rail.
7. Measure $\mathrm{Y}-1$ and $\mathrm{Y}-2$ (Fig. 2) on center of bolt.
8. Measure Y-3 (Fig. 2) outside of front hanger to outside of rear hanger.

NOTE: Please accompany this document with clear pictures of all points of issue. Be sure tire wear pictures are shot straight on (Fig. 5).
