Motorhome Left Rear Dual tires	7,400	lbs.
Motorhome Right Front Tire	3,340	lbs.
Motorhome Right Rear Dual Tires	8,580	lbs.

## MOTORHOME WITH TOW CAR

When weighing your motorhome and tow car, the motorhome must be completely on the scale and it is best if you position the steer axle (front wheels) of the motorhome on platform 1, and the drive axle or rear axle of the motorhome on platform 2. The tow car will normally show up on platform 3.
